

INTERACTIVE FLAT PANEL

All-in-one computer and touchscreen, mountable to various surfaces and available in various sizes up to 98 inches.

Portable display materials have become lighter and far more interactive. Our Interactive Flat Screen Panels are perfect for gaining more impact but why stop there... with their inbuilt touchscreen capability users can discover and search at their own pace – we call it Self Directed Engagement and we're excited to bring it to the marketplace.

Perhaps you want to demonstrate your website, and have visitors use it on your stand? With our Interactive Flat Panel displays they can scroll, click and type quickly and easily.

Perhaps you have bespoke content that you wish to demonstrate, such as an app in a live environment? It's no problem for our Interactive Flat Panels running on Windows OS.

Integrate these flat panels easily into one of our fabric display stands to create a unique engagement or mount them within a table top to add further interest.

BENEFITS

PLUG & PLAY

The computer and screen are combined in one unit, so there's less wires and no need for an additional laptop.

FLEXIBLE MOUNTING OPTIONS

The screens can be mounted vertically or horizontally depending on your requirements, the nature of your content and the space you have. They can even be mounted on a table top!

OUTDOOR CAPABLE

Outdoor units are available upon request.

TOUCHSCREEN SIMPLICITY

Users simply navigate by touching the screen. Just like tablets, our screens offer touch, drag, drop and pinch functions. They can discover your product at their own pace, in a way they find intuitive, stopping to read the information that is of interest to them.

DATA CAPTURE

Invite users to leave their details on screen, so you can communicate with them later.

TECH ADDITIONS

Our screens can be linked to Bluetooth beacons, Tap n Go Near Field Communication solutions as well as QR code readers and NFC camera accessories.

CONTENT DEVELOPMENT

Allow Brandstand to develop your branded content from scratch or create a touchscreen 'home' that delivers your existing digital content through a clever, user friendly interface. We'll bring together your images, brand, video, website, blog content and social media into one display solution.

PROGRAMMING

Our developers are skilled in creating low bandwidth content that delivers a bespoke engagement. We can programme our solutions to be time or place targeted and integrate our solutions into many 3rd party apps and hardware features.

LOGISTICS & STORAGE

Our Warehouse team will take care of the details, from installation through to issue management, retrieval and storage. We've got you covered anywhere in New Zealand and abroad.

SUPPORT

Our team of IT Specialists and Account Managers are only a phone call away. Each of our interactive digital solutions is remotely monitored and can be accessed easily from anywhere in the country. We're here to guide you and to support you every step of the way.

CREATIVE

When you need your content to not just stand out but also be effective, then we have the creative skills to deliver. We'll work with you to create an incredible interactive display that will both inspire and inform your customers.

INTERACTIVE DIGITAL KIOSK

Our fully interactive digital kiosk really makes a statement

When you want to make a BIG impact, the Interactive Digital Kiosk is the perfect solution. It's available as either a 55 or 65 inch, floor-standing, fully interactive digital kiosk.

The real advantage of the kiosk is that it allows users to guide themselves or be led through a demonstration. It's touch-screen simplicity provides an incredible user experience, whilst it's sheer size guarantees impact.

The Interactive Digital Kiosk is ideal for Conferences, Mall Displays, Exhibitions, Retail, Showrooms and Experiential activations. It's a perfect stand-alone engagement piece or complementary to any presentation.

Running on Windows OS, this unit can be uploaded with an App, with a video presentation or linked to the internet to run a website. Our service team can login to the unit remotely and update any information 'on-the-fly' if required. Through the CMS we're able to drive messaging by time of day, day of the week, location, or other specifics. For instance, how about changing your message for breakfast, lunch and dinner?

We provide a full technical support service throughout NZ and we'll deliver and set up the units anywhere in the country. If you need help with content creation, then we have experts that can design bespoke websites or apps that work through the kiosk.

Available to buy or rent

BENEFITS

SIZE

These 55 and 65 inch floor standing units make a huge impact - people just have to stop, view and touch!

PLUG & PLAY

The computer and GIANT screen are combined in one unit, so there's less wires and no need for an additional laptop.

SCREEN REAL ESTATE

These kiosks offer an amazing amount of screen real estate - allowing your creativity to shine through and make a really bold statement.

OUTDOOR CAPABLE

The Screens can be certified for outdoor use if needed (IP65).

TOUCHSCREEN SIMPLICITY

Users simply navigate by touching the screen. Just like tablets, our screens offer touch, drag, drop and pinch functions. They can discover your product at their own pace, in a way they find intuitive, stopping to read the information that is of interest to them. We call it Self Directed Engagement.

DATA CAPTURE

Invite users to leave their details via screen prompts and screen keyboard, so you can communicate with them later, no keyboards or mouse - just simple on-screen prompts.
